REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowing this application is the specific recitation in the claims of the following:

Claim 1 that sets forth a data sample and transmission module for a power distribution system and sets forth a network interface for placing the microprocessor in communication with a network so that the microprocessor samples one or more first signals indicative of a condition in the power distribution system based in part upon a synchronization signal receivable from the network and so that the locator device changes from the first state to a second state in response to a command receivable from the network.

Claim 11 recites a protection system for a power distribution system and includes a first module in communication with a first circuit breaker, the first module having a first locator device defined thereon, the human machine interface having a first representation of the first module, a second module in communication with a second circuit breaker, the second module having a second locator device defined thereon, the human machine interface having a second representation of the second module; and a network in communication with a central computer, the first module and the second module so that the central computer controls the first and second circuit breakers, the first representation being selectable to change the first locator device from a first state to a second state.

Claim 17 recites a method of corresponding a virtual representation to a particular device among a plurality of devices including selecting the virtual

representation on an interface; sending a first command from the interface to a central processor in response to selecting the virtual representation, the first command being representative of a locator state for the particular device that corresponds to the selected representation; sending a second command from the central processor to the particular device in response to the first command; sending a third command from the plurality of devices to a locator device in response to the second command, and changing the locator state of at least the particular device in response to the third command.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
